SUMMARY

Highly motivated **undergraduate student** seeking a **Frontend or Software Developer** role. Proficient in **full-stack** technologies including React.js, Node.js/Express.js, and databases (MongoDB, SQL/MySQL). Strong foundational knowledge for building robust web applications.

SKILLS

- **Technical Skills**
 - **Languages:** JavaScript (ES6+), HTML5, CSS3, SQL (MySQL), MONGODB (NoSQL)
 - **Frameworks & Libraries:** React.js, Node.js, Express.js, Material.UI, Bootstrap, Tailwind CSS
 - **Databases:** MongoDB
- **Soft Skills**
 - Problem Solving, Communication

EDUCATION

NGF College of Engineering and Technology

Bachelor of Technology (B.Tech) in Computer Science

| 2023 – 2027

CGPA: 7.95/10.0

Bihar Secondary Education Board

12th Grade: 75% (PCBM)

| 2023

INTERNSHIPS

- **Software Developer Intern | Sysslan IT Solution | Remote | April 2026 – May 2026**
 - Developed a full-stack Event Feedback System (EFS) using the MERN stack (React.js, Node.js/Express.js, MongoDB) to efficiently collect, manage, and display user feedback.
 - Developed and optimized responsive frontend pages and navigation, significantly improving UI/UX across mobile and laptop devices.
 - Established seamless data flow by integrating frontend and backend components using RESTful APIs to dynamically fetch and store submitted feedback.
 - Successfully deployed the application online. [EFS](#) and utilized Git/GitHub for collaborative version control ([code](#)).
 - Collaborated with the development team on task-based milestones, completing all assigned project levels within deadlines.

PROJECTS

A Full-Stack Airbnb Clone

Full Stack Web Application | Node.js, Express.js, MongoDB

- Developed and deployed a full-stack Airbnb Clone utilizing **Node.js/Express.js** for the backend and **MongoDB** for data storage, resulting in a scalable application.
- Developed secure user authentication using the **Passport** library for login and signup, ensuring robust user data protection.
- Built a highly responsive user interface with **HTML, CSS, and JavaScript**, optimizing the presentation of listings across all device types.

- Implemented core rental platform functionality, including handling data, routing, and comprehensive management of property listings and user data.

AttendEase – Smart Attendance Management System

Full Stack Web Application | MERN Stack

Project–Link <https://attend-mang-sys-frontend.onrender.com> | [code](#) Progressing.....

- Developed and deployed a full-stack **AttendEase – Smart Attendance Management System** using the **MERN Stack** (MongoDB, Express.js, React.js, Node.js) to efficiently track and manage student attendance.
- Developed a responsive frontend with **React.js** and **CSS** to ensure clean UI/UX and mobile compatibility across all devices.
- Established robust backend services with **Node.js/Express.js**, managing all student and attendance records in **MongoDB**.
- Integrated frontend and backend via **Axios** to enable core features, including secure attendance marking, record tracking, and automated percentage calculations.
- Managed project workflow and collaborative development using **Git & GitHub** for version control.
